## Head Injury Substitution Procedure

- A player who is suspected to have suffered a head injury may be substituted while being evaluated by a Qualified Medical Professional (QMP). The substitution for the evaluation of the concussion/head injury will not count against the team's total number of substitution moments in the match (temporary substitution).
- If the player is deemed by a QMP to not have suffered a concussion, the player may re-enter the match at any stoppage of play and must replace the temporary substitute; this head injury evaluation substitution will not count as a substitution moment. Furthermore, the temporary substitute will be able to re-enter the match at a later time if not previously substituted out earlier in the match for a non-head related substitution.
- If the player is deemed by the QMP to have suffered a possible concussion and is not cleared to return to play, the temporary substitute will be considered a permanent substitute. This will not count as a substitution moment.

### Policy Principles

- A "concussion substitution" may be made regardless of the number of substitutes or moments already used.
- If all substitutes have been used the "concussion substitute" can be a player who has previously been substituted.
- Each team is permitted an unlimited amount of "concussion substitutions".
- If the team has only 2 goalkeepers eligible to play on the game day roster and the starting goalkeeper has been subbed out during the match and the new goalkeeper is suspected of a concussion, the previously substituted goalkeeper will be allowed to reenter for the head injury evaluation.
- If the goalkeeper cannot return, the previous goalkeeper will remain in the match.
